Notes to Condensed Interim Consolidated Financial Statements Three and Nine Months Ended March 31, 2016 and 2015 (Expressed in Thousands of Canadian Dollars) (Unaudited)

1. Nature of Operations and Going Concern

Melior Resources Inc., (the "Corporation"), is a Canadian company focused on making strategic investments in, and developing, resource based opportunities offering capital appreciation potential.

The Corporation is incorporated under the laws of the province of British Columbia, Canada. The Corporation's principal place of business is 120 Adelaide Street West, Suite 2500, Toronto, Ontario, Canada.

These consolidated interim financial statements have been prepared under the assumption that the Corporation will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The Corporation has incurred ongoing losses and had a cumulative deficit of \$516,004 as at March 31, 2016 (June 30, 2015 \$513,085). The continuing operations of the Corporation are dependent upon its ability to continue to raise adequate financing, to commence profitable operations in the future, and repay its liabilities arising from normal business operations as they become due. As at March 31, 2016, the amount outstanding on the loan from Pala Investments Limited ("Pala") was \$2,819. This amount is due to be repaid on August 27, 2016. There is a significant risk that if the Corporation is unable to extend the repayment date on the loan, or find alternative sources of financing, it will be unable to repay the Pala loan on the maturity date. These material uncertainties may cast significant doubt upon the Corporation's ability to continue as a going concern.

As at March 31, 2016, Pala owned directly or indirectly 44.7% of the Corporation's issued and outstanding common shares.

2. Summary of Significant Accounting Policies

Statement of Compliance

The Corporation applies International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations issued by the IFRS Interpretations Committee ("IFRIC"). These condensed interim consolidated financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting. Accordingly, they do not include all of the information required for full annual financial statements required by IFRS as issued by IASB and interpretations issued by IFRIC.

The policies applied in these condensed interim consolidated financial statements are based on IFRS issued and outstanding as of February 18, 2015, the date the Board of Directors approved the statements. The same accounting policies and methods of computation are followed in these condensed interim financial statements as compared with the most recent annual financial statements as at and for the year ended June 30, 2015. Any subsequent changes to IFRS that are given effect in the Corporation's annual financial statements for the year ending June 30, 2016 could result in restatement of these condensed interim consolidated financial statements.

New Standards Not Yet Adopted and Interpretations Issued But Not Yet Effective

Certain pronouncements were issued by the IASB or the IFRIC that are mandatory for annual periods commencing after January 1, 2014 or later periods. Many are not applicable or do not have a significant impact to the Corporation and have been excluded from the table below. The following have not yet been adopted and are being evaluated to determine their impact on the Corporation and the expected adoption date.

- (i) IFRS 9 – Financial Instruments ("IFRS 9") was issued by the IASB in October 2010 and will replace IAS 39 - Financial Instruments: Recognition and Measurement ("IAS 39"). IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 will be effective as at January 1, 2018. The Corporation is in the process of assessing the impact of this pronouncement.

The Goondicum ilmenite Project comprises two mining leases located in Central Queensland, Australia and is wholly-owned by Goondicum Resources. Goondicum Resources mined the deposit for a period of nine months between fiscal 2012 and 2013 before placing the mine on care and maintenance in June of 2013. Goondicum Resources commenced the upgrade and the necessary work to restart the Goondicum mine, in August 2014. Goondicum Resources commenced mineral commissioning of the upgraded Goondicum mine processing facility in April 2015.

In August of 2015 the Corporation suspended operations at its Goondicum operations due to unfavourable movements in the ilmenite market. Consequently, the Corporation undertook an impairment test on the cash generating unit being the plant, property and equipment and mineral properties. For the impairment test, a value in use model ("VIU") was used to determine the recoverable amount as this was expected to be higher than sale value less costs of disposal.

The key assumptions and estimates used in determining the VIU were calculated using discounted after-tax cash flows based on cash flow projections in the Corporation's current life of mine plans. These projected cash flows were based on the latest expectation of future ilmenite prices, future capital expenditures, production costs estimates, discount rates and exchange rates. VIU was determined by calculating the net present value ("NPV") of the future cash flows expected to be generated by the mine. The key assumptions used by the Corporation for impairment testing are: ilmenite price per tonne US\$145-US\$220; discount rate of 20%; life of mine years of 13. For the three and nine months ended March 31, 2016, impairment charges totalled \$nil (2015 - \$nil). A 10% decrease in the price of forecasted ilmenite, holding all other assumptions constant would result in a decrease in fair value of \$8,490. Management continues to monitor and assess impairment of the Corporation's assets, particularly in light of the weakness in the ilmenite market.

8. Obligation Under Finance Leases

As at	March 31, 2016	June 30, 2015
Obligation under finance leases	\$ 36	\$ 102
Less: Current portion	(35)	(54)
Long-term portion	\$ 1	\$ 48

During the three months ended March 31, 2016, \$nil (nine months ended March 31, 2016 - \$41) was paid to terminate leases relating to sold vehicles.

9. Decommissioning Liability

For the Corporation, asset retirement obligations primarily relate to the dismantling of the Goondicum Ilmenite Project. The estimate of future site removal and restoration costs depends on the development of environmentally acceptable mine closure plans. A summary of the changes in the provision for reclamation liabilities is set out below.

	Nine Months Ended March 31, 2016	Year Ended June 30, 2015
Opening balance	\$ 819	\$ 638
Accretion	-	22
Re-measurement of estimate	-	192
Foreign exchange	33	(33)
Closing balance	\$ 852	\$ 819

The mine closure provision liability is based upon numerous estimates and assumptions, as follows:

- Total undiscounted amount of future retirement costs was determined to be \$1,282;
- Weighted average risk-free interest rate at 3.25%; and
- The \$863 undiscounted provision is expected to be fully disbursed in fiscal 2029.

The Corporation has posted rehabilitation deposits totalling \$1,412 with the State of Queensland as security for the Corporation's obligation under the mine closure plan.

10. Loan Payable

On August 2, 2015, the Corporation entered into a US\$5,000 loan facility agreement with Pala Investments Limited bearing interest at 10% per annum, a term of 365 days from the first draw down (August 28, 2015), and subject to a commitment fee equal to 2% of the unused portion of the loan facility, calculated daily. The Corporation paid Pala an arrangement fee of US\$100, upon the initial draw down against the loan facility. The Loan facility is secured by the assets of the Corporation.

Draw downs on facility	\$ 2,633
Interest	149
Commitment fee on unused portion of loan facility	53
Foreign exchange	(19)
Balance, March 31, 2016	\$ 2,816

11. Commitments and Contingencies

There are currently two separate entities that have a contractual entitlement to receive a royalty based on the gross income of Goondicum Resources derived from all mineral sales from tenements. The total of these royalties is 1.2375% of gross income. A third entity holds the right to receive a gross income royalty of 1.0125% of gross income derived from tenements on all minerals except ilmenite and apatite.

Goondicum Resources pays the state government a royalty of 5% of the revenue for all ilmenite sales and approximately A\$0.80/tonne for all phosphate rock sales. Included in accounts payable and accrued liabilities is A\$482 (\$480) (June 30, 2015 - A\$494 (\$475)) pertaining to royalties.

A separate entity is also entitled to a success fee of A\$419 (\$417) if gross revenues of Goondicum Resources exceed A\$23,000 (\$22,908) in any rolling 12 month period.
